# ABOUT BABYMATIC

\$BABYMATIC was founded on 23 July 2021 by based developers who have done successful projects in the past.

With the auto-claim hourly feature, simply hold \$BABYMATIC and you'll receive MATIC automatically in your wallet.

Name: BabyMATIC

Symbol: BabyMATIC

Binance Smart Contract Address: 0x4d51ea1c87abea6b624f8d6c07c8f52f79ae5163

# WHY BABYMATIC

- ▶ Our rewards system is based on Volume (buying+selling activity to cover gas fees). The moment volume target is achieved, the reward gets triggered and it is autoclaimed to the holder's wallet! Every hour!
- ▶ The earlier you get in, the better your holdings are going to grow! And as the volume and transactions increase, your rewards will keep increasing on hourly basis.
- ▶ We want to make you rich and \$BABYMATIC is here to make your MONEY work for YOU; quite literally! Who doesn't love passive income every hour!
- ▶ 12% reflection rewards is one of the highest rewards to be given by any BSC token till now.

# WHY MATIC REWARDS?

- ▶ Well, based on fundamental and technical analysis, several analysts and experts believe Polygon is likely a good investment, and investing in Polygon (MATIC) as one of the best high-yield assets is one of the best decisions you could ever make.
- ▶ As the novel token powering Polygon, MATIC has increased substantially since 1st January 2021. From a thorough assessment of its price history in the first six months of 2021, MATIC reaching an all-time high of **\$2.68** on Tuesday, 18th May is significant evidence that the digital asset is not slowing down. This is the primary reason why most experts think MATIC has plenty of room for growth based on the continued success of Ethereum that makes its issuing authority, Polygon, stay relevant as a layer-2 scaling solution.
- ▶ Others believe that investing in Polygon (MATIC) is one of the smartest decisions any novice or experienced investor can make with an eye on the long term. Therefore, 2021 could be the right time to invest in Polygon (MATIC) while the coin is not only performing well but trades at a relatively smaller price than other competing digital currencies.

# TOKENOMICS

❑ Total Supply: 1,000,000,000

❑ Fair launched at less than 5k

❑ Initial Liquidity 9.5 BNB

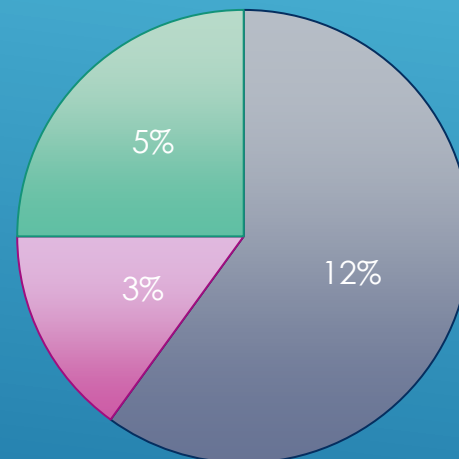

❑ Liquidity locked till 2050

❑ Our Anti-Whale Features during launch:

❑ 1% Max transaction

❑ 2% Max Wallet

## BabyMatic Tax 18%

■ Matic Rewards ■ Auto Liquidity ■ Marketing

# ROADMAP PHASE 1

We are in the initial phase of our roadmap in 2021 2nd quarter. We launched our coin with over 1000 members in Telegram and with initial marketing, we now have over 2000 members. BabyMatic has been launched on Pancakeswap for trading and will soon branch over to other exchanges by end of the year.

Regular competitions and giveaways are being organized to keep the community active.

We plan to get CoinGecko and CoinMarketCap listing by end of this quarter to boost our growth.

# ROADMAP PHASE 2

After listings, we plan to get more Youtube influencers to partner with our coin as well as promote it to keep the momentum growing and reach a wider audience.

We believe that promotions should be done at a steady pace rather than one big push to keep the project stable.

The push towards Chinese community will be done via BTOK ads and shilling.

By the end of the quarter, we plan to move towards more exchange listings and get audited by professional auditors.

BabyMatik merchandise is already in works but release will be by end of the year.

2022 plans are yet to be decided and will be based on community votes.

# DISCLAIMER

Cryptocurrency and Blockchain projects are high risk operations because of their experimental nature. By participating in the project, participants declare to understand and assume the following risks:

- ▶ **The lack of regulation:** the purchaser agrees not to benefit from any guarantees associated with presale on regulated financial markets or other regulated financial investments.
- ▶ **Capital Loss:** the purchaser accepts the risk of a total or partial capital loss in cryptocurrency or in the token.
- ▶ **Volatility or market risk:** the value of tokens, just like that of cryptocurrencies in general can be extremely volatile and subject to significant and largely unforeseeable fluctuations. Moreover, the market or markets on which these tokens are traded do not offer the same guarantees that are generally applicable to conventional financial markets.

# CONCLUSION

BABYMATIC team is extremely transparent regarding every step they take and provide all the updates to the community regarding their moves.

12% reflection rewards for holding is one of the highest among any cryptocurrency coins as this project plans to give back to the community for trusting in them.

The team will continue to push forward to reach new heights along with the community support.
